

DINAN

D100-0940 SPRING SET; TESLA MODEL 3

INSTALLATION NOTES

PLEASE READ BEFORE BEGINNING INSTALLATION

The front & rear springs look similar to each other. Please refer to the part number printed on each spring to determine the correct installation location:

- D100-0895 = Front Spring
- D100-0897 = Rear Spring

** For best results, we recommend installation of the companion handling kit, p/n D193-0941. Use of this kit would yield the lowered ride height and handling performance as designed. Using the stock bumpstops, or cutting the stock bumpstops, may result in undesirable results.

Alignment:

- An alignment is required after installation.
- All Dinan suspension alignments are done with no extra weight inside the vehicle.
- Specifications are as follows:

| FRONT: | Setting | Tolerance |
|---------------|---------|-----------|
| Camber | -0.6° | ± 0.45° |
| Caster | 5.5° | ± 1.0° |
| Total Toe | 0.14° | ± 0.30° |
| REAR: | | |
| Camber | -1.2° | ± 1.00° |
| Total Toe | 0.45° | ± 0.30° |

If you encounter any difficulties during the installation, or if these instructions are not clear to you, please call Dinan's Technical Support Staff @ (800) 341-5480.

Happy Motoring!
