

DMG CLASSIC PARTS

We appreciate you purchasing our unique 73-87 gravel guard for your GM Truck. The Gravel Guard will fill in the spacing between the tail gate and rear bumper. This piece is raw steel ready for primer and paint. We recommend you apply a light coat of oil for longer shelf life. If you notice minimal surface rust, wipe with steel wool. Wipe off oil before primer and paint. This piece is easy to install that requires NO CUTTING NO DRILLING & NO WELDING. **Part #SS7387**

Instructions:

1. Loosen the rear bumper bolts and remove your rear bumper.
2. Place the taller side of gravel guards towards the rear of the truck and place the all-thread in the holes of the frame of your truck. Secure the gravel guard by using a lock washer and nut. Snug tightly.
3. Install your rear bumper and secure with bumper bolts tightly.
