

Instructions

Gear Selector Bushings

N.B: This instruction sheet should be used in conjunction with the workshop manual and proper safety procedures followed.

Note - these bushings can be accessed from inside cabin

Application - Mitsubishi Eclipse
- 1995-on
(Refer current catalogue listing)

Contents - 4x bushing 91209
- 4x bushing 91210

- Remove gear knob, and proceed to un-screw console.
- Un-bolt and remove old rubber bushings.

Do not discard steel items - these will be re-used.

- Place bushing 91209 and OE steel tube on high side of selector plate.
- Place bushing ring 91210 on low side of selector plate - over 91209 bushing.
- Tighten all points evenly with original bolts.
- Check selector function, and re-fit console.

N.B: It is recommended that a licenced workshop or Tradesperson carry out the above procedure and that workshop manual and relevant safety procedures are followed in addition to the above.
